**Economy is a critical factor that affect to the livelihood of people at all levels. While the world economy changes, Thai economy must be adjusted to catch up the trend of globalization. Having good knowledge of economics, therefore, helps us to well understanding of the economic situations and update to the world changing.**

**Faculty of Economics is an important educational institution. Its role is not solely to produce the graduate students in economics but also to create and develop the economics knowledge as an important foundation for the developmentof Thai economy in the future. Moreover, Faculty of Economics must play an important role in guiding our society into the right direction.**
